**BILL FRISELLS DISFARMER**

Disfarmer, named after the cranky Arkansas photographer who created gripping images of his neighbors, finds Frisell teamed with steel guitarist Greg Leisz, violinist Jenny Scheinman and bassist Viktor Krauss for a set of 26 evocative miniatures. Each one flits by like a half-remembered dream, yet paradoxically their sum amounts to one of Frisell's loveliest, most consistently affecting recent creations." - Steve Smith, Time Out, New York

"The music of omnivorous guitarist Bill Frisell reflects an eclectic range of influences .... On "Disfarmer," he draws inspiration from the Depression-era portraits of little-known Arkansas photographer Michael Disfarmer. The result is a provocative soundscape that features a mixture of acoustic and electric guitars.... Creatively restless, Frisell is best suited for exploring vast territory and responding with imaginative integrity, which is evidenced on "Disfarmer." - Dan Ouellette, Billboard
